Q320 trends

- Monthly volatility typical given the low-volumes of the summer months (July and August)

Q420 expectations

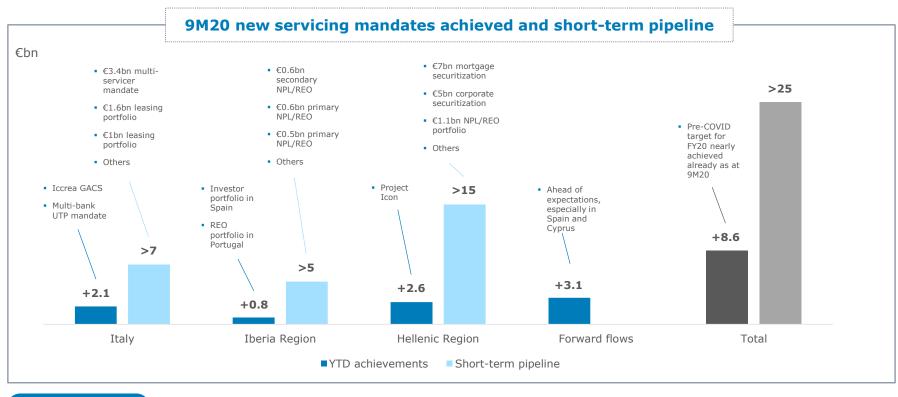

- **Q420 expected to confirm current expectations,** despite higher business seasonality and COVID-related uncertainty
- Activity of legal courts as expected still below pre-COVID levels, with auction volume and frequency weighing on collection

Q320 collections confirm current expectations for FY20

Strong servicing pipeline and supportive operating/regulatory environment

Regulatory update

- · No signs of material changes in regulatory scenario with impacts on servicing industry
- Temporary banking moratoria in place across markets: no impact on current GBV under management, potential to delay new flows
- Several Governmental schemes in place to support vulnerable debtors and help restructuring of SMEs in most cases maturing in Dec. 2021

Operational update

- doValue team fully operational across markets and adjusting recovery/sales strategies to account for current environment
- Activity of legal courts already normalized in Iberia while still below full operational capacity in Italy and Hellenic Region

FY20 target of +€9-11bn new mandates nearly achieved as of September

Evolution of gross book value (GBV) under management

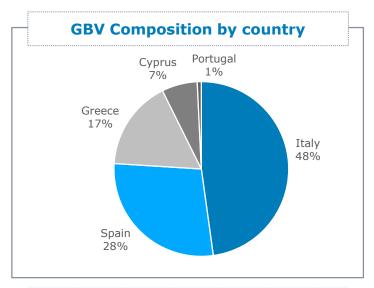

- Assets under management continue to diversify (more asset classes and markets) and grow organically and via M&A
- Inflows from existing clients (forward flow agreements with Unicredit, Santander, Alpha Bank) already +50% above FY20 expectations, despite banking moratoria in place
- Inflows from new clients above the 1H20 figure due to the Efesto UTP mandate in Italy (already under management)
- Icon portfolio award in Greece and Iccrea GACS award in Italy would bring total GBV to €163bn
- Collections and REO sales improving in line with expectations but still affected by legal system not operating at full capacity

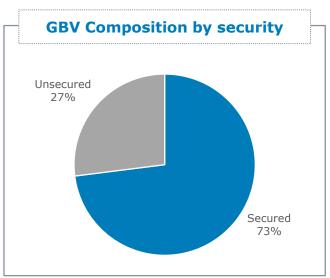

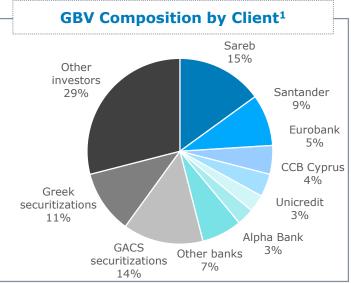

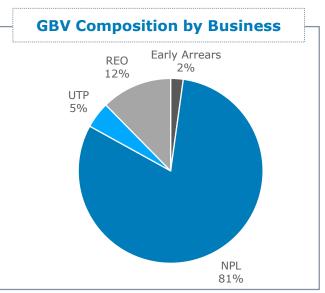

GBV details: one of the most diversified portfolios in the industry

- Figures based 9M20 reported GBV of €159.1bn (recently won mandates not included)
- High quality book composed mostly of large, secured assets
- Country mix: high diversification and focus on most attractive markets
- Client mix: top systemic banks and NPL/RE investors in Southern Europe
- Product mix: servicing Early arrears, UTP,
 NPLs and Real Estate assets, in line with evolution of servicing markets
- Average loan size of €140k in Italy, €74k in Spain, Portugal and Cyprus, >€300k in doValue Hellas and <€50k in doValue Greece

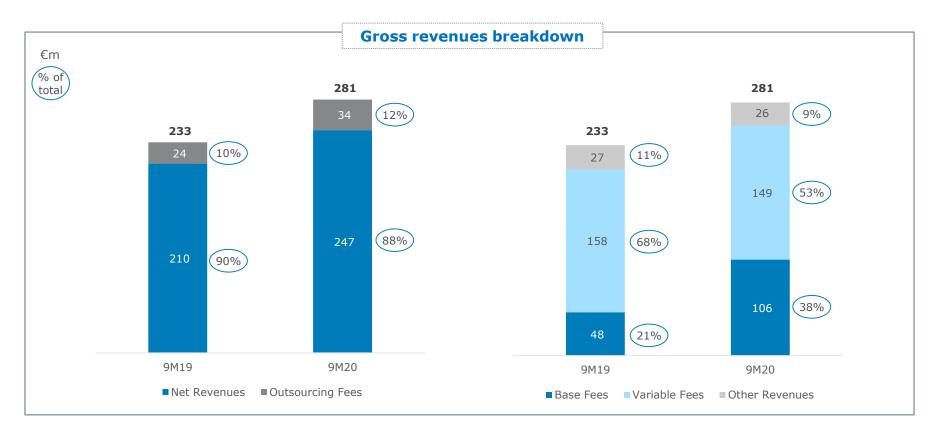

1. "Other Investors" includes Fortress at 23% of total GBV (together with FINO 2 portfolio).

Revenue composition: resiliency in base fees and ancillary revenues

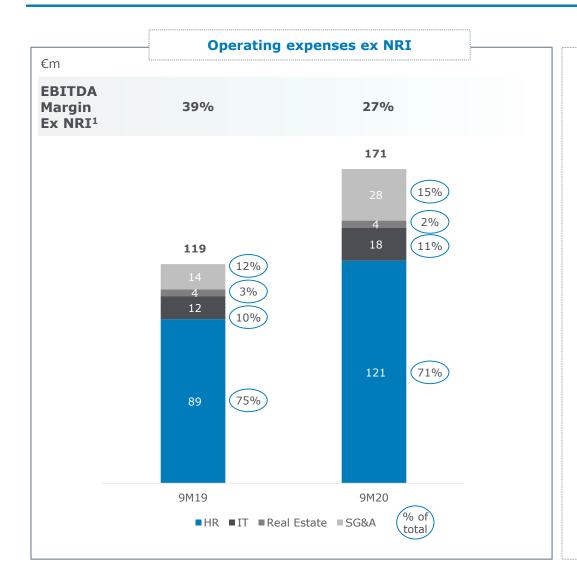

- Base fees nearly doubling as a proportion of revenues at 38%, providing a hedge to current scenario
 - Structural higher exposure to Spain, Greece and Cyprus (base fees ca. 10-15bps vs Italy at ca. 5bps)
 - Variable fees discount the temporary reduction due to COVID-19 (postponement of collections)
- Outsourcing fees higher in absolute terms due to consolidation of Altamira Asset Management and linked to REO services. Excluding M&A, NPL outsourcing fees continue trending down year-on-year

Focus on operating expenses

- Growth in overall cost only due to larger perimeter (Altamira Asset Management and doValue Greece)
- Excluding M&A, total operating costs are down 21% year-on-year, and headcount is down from ca. 1,250 to ca. 1,070 (Italy and doValue Hellas)
- Total Operating Expenses shown here do not include €8.2m Non Recurring Items, mostly related to M&A transaction costs
- Reduction in variable HR cost, from 14% of total HR cost in YE19 to 4% in 9M20
- Lower overall HR cost as a proportion of total cost (from 75% to 71%), also benefiting from Governmental HR cost support programs currently (mostly in Italy)
- Reduced IT and business process outsourcing costs, discounting early benefits of IBM outsourcing
- Real Estate costs down also due to reduction of number of offices in Italy and lower use of co-working space

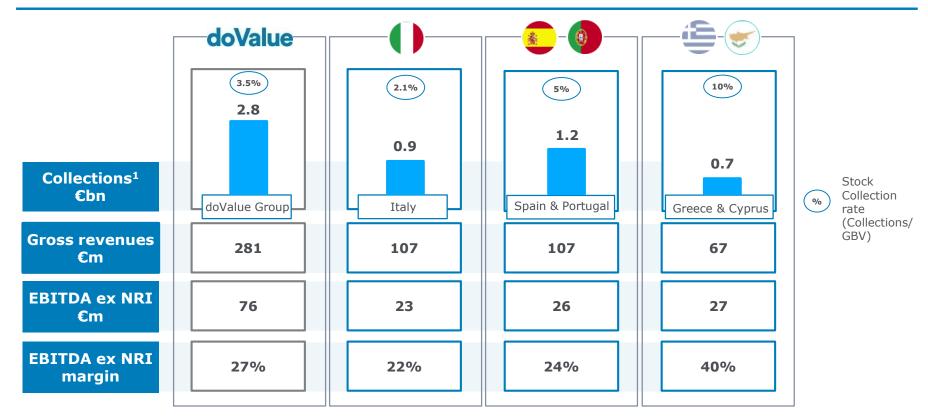

Financial highlights by geography

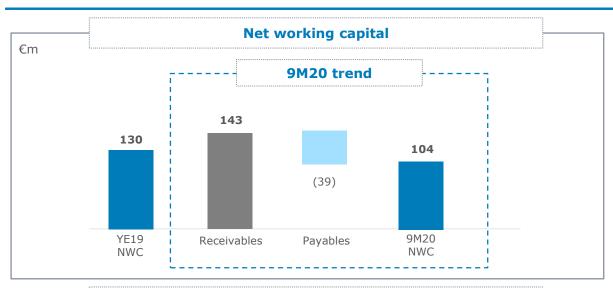

- Structurally higher collection rates in markets ex-Italy, due to shorter timing of legal procedures
- Collections and REO sales trending towards normalization, still affected by legal courts operating below capacity and enforcing Governmental measures in place to limit the spread of COVID-19
- Italy EBITDA compares with 9M19 EBITDA which included one-off indemnity fees
- Spain and Portugal progressing in line with expectations, supported by REO sales and real estate market holding up
- Strong results in Greece and Cyprus, with accretive profitability and downside protection in the form of higher than average base fees. doValue Greece (formerly FPS) tracking ahead of expectations

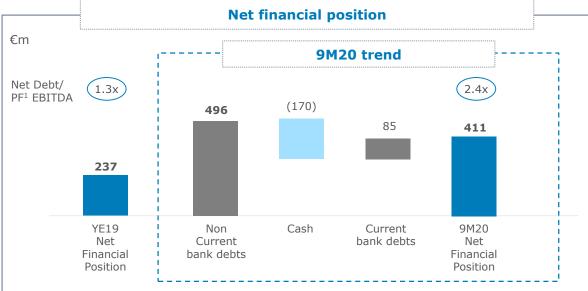

NWC and net financial position

- Stable NWC as compared with 1H20 results, confirming improvement vs YE19 on the back of both lower receivables and higher payables
- Client shift towards investors (paying quicker vs banks) and doValue Greece contracts are key structural NWC positives
- No sign of stress in payments by customers due to Covid-19

- As expected, leverage at 2.4x, covenants provide significant headroom even in case of unforeseen external shocks
- Liquidity further strengthened by undrawn revolving credit facilities of ca. €80m
- No refinancing needs until 2025

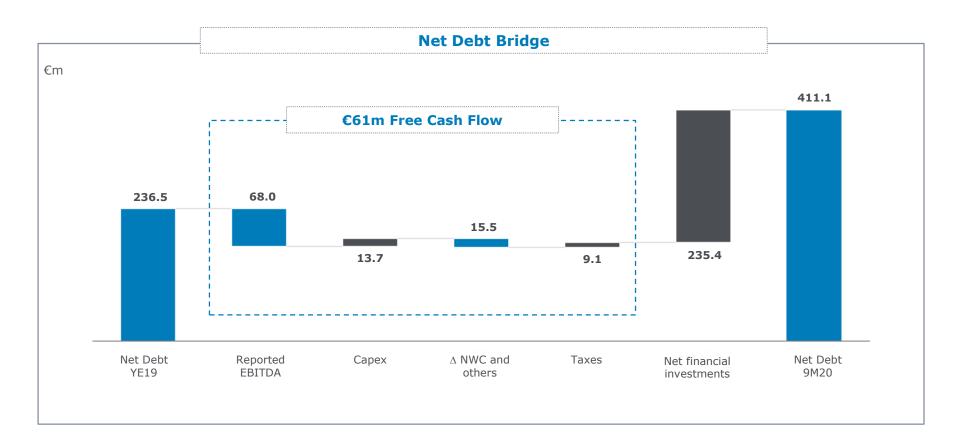

Notes: 1: LTM Pro Forma EBITDA including acquisitions

Net debt trend

- Confirmed highly cash generative nature of business, with positive NWC trend, and limited capex, cash taxes
- Growth in Net Debt only due to acquisition of doValue Greece, closed on June 5th 2020
- Free cash flow generation at €61m in 9M20, supported by positive trend in Net Working Capital
