

**INDEPENDENT AUDITOR'S
REPORT ON THE CONSOLIDATED SUSTAINABILITY STATEMENT
PURSUANT TO ARTICLE 14-BIS OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010**

**To the Shareholders of
Avio S.p.A.**

Conclusion

Pursuant to artt. 8 and 18, paragraph 1 - of Legislative Decree no. 125 of September 6, 2024 (hereinafter also the “Decree”), we have carried out a limited assurance engagement on the consolidated sustainability statement of the Avio Group (hereinafter also the “Group”) for the year ended on December 31, 2024, prepared pursuant to Art. 4 of the Decree, included in the specific section of the management report.

Based on the work performed, nothing has come to our attention that causes us to believe that:

- the consolidated sustainability statement of the Avio Group for the year ended on December 31, 2024 is not prepared, in all material respects, in accordance with the reporting principles adopted by the European Commission pursuant to the Directive (EU) 2013/34/EU (European Sustainability Reporting Standards, hereinafter also “ESRS”);
- the information included in the paragraph “2.1 EU Taxonomy” of the consolidated sustainability statement is not prepared, in all material respects, in accordance with art. 8 of Regulation (EU) No. 852 of June 18, 2020 (hereinafter also the “Taxonomy Regulation”).

Basis for conclusion

We conducted the limited assurance engagement in accordance with the assurance standard of the sustainability report - “Principio di Attestazione della Rendicontazione di Sostenibilità - SSAE (Italia)”. The procedures in a limited assurance engagement vary in nature and timing from, and are less in extent for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the level of assurance that would have been obtained had we performed a reasonable assurance engagement. Our responsibilities pursuant to that standard are further described in the paragraph *Auditor’s responsibilities for the limited assurance of the consolidated sustainability statement* of this report.

We are independent in accordance with the independence and other ethical requirements applicable under Italian law to the limited assurance engagement of the consolidated sustainability statement.

Our firm applies International Standard on Quality Management (ISQM Italia) 1, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our conclusion.

Other matter

The comparative information for the year ending 31 December 2024 presented in the consolidated sustainability statement in the paragraph “*ANNEXES - AVIO GROUP KEY PERFORMANCE INDICATOR (KPI) MODELS*” has not been verified.

Responsibility of the Directors and the Board of Statutory Auditors of Avio S.p.A. for the consolidated sustainability statement

The Directors are responsible for developing and implementing the procedures performed to identify the information reported in the consolidated sustainability statement in accordance with the ESRS (hereinafter the “double materiality assessment process”) and for disclosing this process in “*IRO-1*” paragraph – *Description of the processes to identify and assesses material climate-related impacts, risks and opportunities* of the consolidated sustainability statement. The Directors are also responsible for the preparation of the consolidated sustainability statement, which includes the information identified as part of the double materiality assessment process, in accordance with the requirements of Art. 4 of the Decree, including:

- compliance with ESRS
- compliance of the information included in the paragraph 2.1 UE Taxonomy with art. 8 of the Taxonomy Regulation.

Such responsibility involves designing, implementing and maintaining, within the terms established by the law, such internal control that the Directors determine necessary to enable the preparation of the consolidated sustainability statement in accordance with the requirements of the art. 4 of the Decree that is free from material misstatements, whether due to fraud or error. Furthermore, the abovementioned responsibility involves the selection and application of appropriate methods in elaborating information and making assumptions and estimates about specific sustainability information that are reasonable in the circumstances.

The Board of Statutory Auditors is responsible for overseeing, within the terms established by law, the compliance with the provisions set out in the Decree.

Inherent limitations in the preparation of the consolidated sustainability statement

The information provided by the Group regarding Scope 3 emissions is subject to greater inherent limitations compared to those related to Scope 1 and 2 emissions. This is due to the lower availability and relative accuracy of the data used to define the information on Scope 3 emissions, both quantitative and qualitative, in relation to the value chain.

Auditor's responsibilities for the limited assurance of the consolidated sustainability statement

Our objectives are to plan and perform procedures to obtain limited assurance about whether the consolidated sustainability statement is free from material misstatements, whether due to fraud or error, and to issue an assurance report that includes our conclusion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, could influence the decisions of users taken on the basis of consolidated sustainability statement.

As part of the limited assurance engagement in accordance with the Principio di Attestazione della Rendicontazione di Sostenibilità - SSAE (Italia), we exercise professional judgment and maintain professional skepticism throughout the engagement.

Our responsibilities include:

- considering risks to identify and assess the disclosure where a material misstatement is likely to arise, either due to fraud or error;
- designing and performing procedures to verify disclosures in the sustainability statement where material misstatements are likely to arise. The risk of not detecting a material misstatement due to fraud is higher than the risk of not identifying a material misstatement due to error, as fraud may involve collusion, falsifications, intentional omissions, misrepresentations, or the override of internal control;
- the direction, supervision and performance of the limited assurance engagement of the consolidated sustainability statement. We remain solely responsible for the conclusion on the consolidated sustainability statement.

Summary of the work performed

A limited assurance engagement involves performing procedures to obtain evidence as the basis for expressing our conclusion.

The procedures performed on the consolidated sustainability statement are based on our professional judgement and included inquiries, primarily with the personnel of the Group responsible for the preparation of information included in the consolidated sustainability statement, analysis of documents, recalculations and other procedures aimed to obtain evidence as appropriate.

Specifically, we performed the following main procedures partly in a preliminary phase before year end and then in a final phase up to the date of issuance of this report:

- understanding the business model, the Group's strategies and the context in which the Group operates with reference to sustainability matters;
- understanding the processes underlying the generation, collection, and management of qualitative and quantitative information included in the consolidated sustainability statement, including an analysis of the reporting perimeter;

- understanding the process carried out by the Group for the identification and evaluation of material impacts, risks and opportunities, based on the principle of double materiality, with reference to sustainability matters;
- identification of the information where a risk of material misstatement is likely to arise, taking into consideration, among others, risk factors related to the generation and collection of the information, to the estimates and to the complexity of the related calculation methods, as well as qualitative and quantitative factors related to the nature of such information;
- design and performance of procedures, based on the professional judgment of the auditor of the consolidated sustainability report, to respond to identified risks of material misstatement, also with the support of Deloitte specialists, with reference to specific environmental matters;
- understanding of the process set up by the Group to identify eligible economic activities and determine their alignment to the requirements of the Taxonomy Regulation, and verifying the related information included in the consolidated sustainability statement;
- comparison of the information reported in the consolidated sustainability statement with the information included in the consolidated financial statements pursuant to the applicable financial reporting framework, or with the accounting data used for the preparation of the financial statements, or with the management data accounting in nature;
- verification of the structure and presentation of the information included in the consolidated sustainability statement in accordance with ESRS, including the information related to the materiality assessment process;
- obtaining the representation letter.
