What truly confirms that we are moving in the right direction is the figure for net inflows into managed assets, which reached € 840 million in March and brought the quarterly total to € 2 billion — up 71% compared to the same period in 2024. Loans granted also saw a significant acceleration, with € 301 million in March and a quarterly total of € 849 million, marking a 51% increase year-over-year".

Doris concluded: "We are keeping a close eye on the recent market volatility: it is precisely in times like these when the support of the Family Banker, together with the automatic investment services that make our strategy unique, proves to be crucial in helping customers navigate these phases with confidence and readiness.

We continue to guide our customers in reaching their financial goals with the rational and optimistic approach that have always defined our advisory model".
