PRESS RELEASE

Edil San Felice wins a €20 million contract from ANAS

A three-year Framework Agreement has been signed for the installation of new, higher-performance safety barriers

Orders acquired in 2025 exceed €98 million

Naples, 27 November 2025 – Edil San Felice S.p.A. Società Benefit (the “Company” or “Edil San Felice”) – a leading integrated operator active in the maintenance and redevelopment of critical infrastructure in Italy, listed on the Euronext Growth Milan market – has been awarded a new contract by ANAS with a total value of €20,000,000.

Through this contract, the total value of orders acquired by Edil San Felice in 2025 has risen to over €98 million.

The three-year framework agreement provides for the installation and laying of new road safety barriers along sections in Basilicata, the Autostrada del Mediterraneo and Calabria, which will ensure higher safety standards compared to the existing ones.

Edil San Felice will install N2, H1 and H2 class barriers, all CE marked and compliant with UNI EN 1317 standards, designed to deliver superior performance compared to current solutions on the affected road sections. The use of hot-dip galvanized steel and state-of-the-art components ensures high durability and resistance.

The new barriers will also provide enhanced containment and safety performance thanks to reduced working widths (up to 76 cm for N2, 95–100 cm for H1 and 160 cm for H2) and ASI impact severity values in Class A, ensuring greater protection for road users.

The H2 models have also been tested and certified in real configuration on embankments, a typical condition of ANAS road sections, confirming the reliability of the adopted solutions.

Installation will be monitored through geo-referenced Push-Pull tests, ensuring quality standards exceeding minimum requirements.

Lorenzo di Palma, CEO of Edil San Felice, commented: *"We are particularly proud to have been awarded this important and strategic contract by ANAS, which concretely reflects Edil San Felice's mission: to contribute to the development of increasingly safe, modern and efficient infrastructure for citizens. The quality of the installed barriers and the attention dedicated to every execution phase confirm our commitment to protecting road users and preventing risks. This contract fits into an already solid and structured growth path, making 2025 a year of strong development in terms of orders acquired, and allowing us to further strengthen revenue visibility."*
