Methodological Notes

The balance sheet and income statement schemes contained in this news document have been reclassified along management criteria in order to provide an indication on the Group's overall performance based on more easily understandable aggregate operating and financial data. These layouts have been prepared based on the financial statement layouts indicated in the Bank of Italy's Circular no. 262/2005 and following updates.

- Following the public tender offer launched on Anima Holding S.p.A. (Anima) in November 2024 by the Banco BPM Group, through Banco BPM Vita, on 11 April 2025 the transaction was completed reaching an interest of 89.949% of the share capital of Anima, vs a stake of 21.973% already held in Anima before the launch of the Offer. In light of this, full Anima's contribution to the income statement is reported in the consolidated financial statements, line by line, in the second quarter of 2025. With regard to the first quarter of 2025, the related economic contribution - when the 21.973% stake was classified as an associate - is instead included in the reclassified income statement item 'Result of investments measured at equity'.

In light of the above, in this presentation, the following P&L data are reported with regard to 2025

- 2025 Stated**, which is the effective contribution of Anima to the group's P&L, considering the perfection of the transaction in Q2 (i.e. consolidation line by line, in the second and third quarter of 2025 and the contribution of the 21.973% stake within the item 'Result of investments measured at equity' for the first quarter).
- 2025 Proforma**, which considers the contribution of Anima to the group's P&L as if the stake of 89.949% had already been achieved on 1 January 2025, with a consolidation line-by-line for all the twelve months.

Moreover, also the balance sheet figures starting from 30 June 2025 reflect the consolidation of Anima and the allocation of the related goodwill within the intangible assets.

- Starting from 30 June 2025, certain changes have been made to the criteria for aggregating items in the reclassified income statement in order to allow for a better assessment, on an operating basis, of the economic contribution provided by the various operating segments. Specifically:
 - the income components constituting remuneration for structuring and hedging risks on certificates issued, placed or structured by the Group, as well as those relating to remuneration for the sale of derivative hedging contracts to retail and corporate customers, previously reported under 'Net financial income', are now included under 'Net Fees and Commissions';
 - the impact of the realignment of intercompany revenues and costs due to the different recognition criteria adopted by Banco BPM (upfront recognition of distribution fee income) compared to those adopted by the Group's insurance companies (recognition of distribution fee expense over time), previously reported under 'Insurance result', are now recognised as an adjustment to 'Net Fees and Commissions', in line with the consolidated presentation.

Moreover, starting from the third quarter of 2025, the structure of the reclassified income statement has been further modified, with the aim of ensuring greater alignment between the aggregates highlighted therein and those used to comment on the Group's performance.

Finally, starting from 31 March 2026, costs incurred in connection with synthetic securitization transactions, relating to the purchase of credit risk protection on loan portfolios, are reported under "Other net operating items". Until 31/12/2025, such costs were included in the reclassified line item "Net fee and commission income". The reclassification adopted as from 31/03/2026 aims to provide a more consistent representation of their economic nature and to enhance the readability of revenue aggregates.

In order to ensure a like-for-like comparison, the figures for previous periods have therefore been restated, applying all the new classification criteria described above.

- The Group capital ratios and data included in this presentation are calculated including the interim profit and deducting the amount of the dividend determined according to the current regulation. Furthermore, data as at 31/12/2025 exclude the application of Art. 468 of the CRR 3 on FVOCI reserves, being this option terminated at YE 2025.
