PRESS RELEASE

Edil San Felice awarded €10.4 million contract by ASPI for network maintenance and regeneration works

Four-year framework agreement signed

Naples, 11 September 2026. Edil San Felice S.p.A. Società Benefit (“the Company” or “Edil San Felice”), a leading integrated operator active in the maintenance and redevelopment of critical infrastructure in Italy and listed on Euronext Growth Milan, has been awarded, following a public tender procedure, a new contract by Autostrade per l’Italia for a total value of €10.4 million.

The four-year Framework Agreement covers maintenance, improvement and regeneration works on the A13, D13, D23 and R13 sections under the responsibility of Autostrade per l’Italia’s Bologna Branch Directorate III.

The works will be aimed at improving the safety, functionality and durability of the motorway infrastructure concerned through the regeneration of concrete structures, volume restoration works, structural strengthening, works on expansion joints, waterproofing, water collection and drainage systems, and subsequent resurfacing.

The activities may also be carried out while traffic remains in operation and through both daytime and night-time worksites, requiring careful planning of the various work phases, direct supervision of operational activities and compliance with the safety standards applicable to works carried out on the motorway network.

The contract further strengthens Edil San Felice’s positioning in the field of advanced maintenance and regeneration of motorway infrastructure, confirming the Company’s ability to operate on strategic assets through specialist technical expertise, direct management of worksites and a strong local presence.

Lorenzo Di Palma, CEO of Edil San Felice, commented: *“We are very pleased with this award, which confirms the strength of our operating model. This contract comes at a particularly dynamic time, with Edil San Felice currently engaged in the execution of a record backlog of more than €250 million. Specifically, the activities envisaged under the Framework Agreement involve a high degree of technical complexity, also in view of the possibility that works may be carried out while traffic remains in operation. In this context, our zero-subcontracting policy represents a distinctive factor, as it enables us to maintain direct control over the works and ensure high standards of safety and execution quality. Our operational presence in the area, through our Bologna office, also represents an additional strength in ensuring proximity and continuity in the execution of the works.”*

This press release is available on the Company's website <https://www.edilsanfelice.it/> in the Investor Relations - Press Releases section and at <https://www.emarketstorage.it/it>.
