Operating cash generation

A self-funding business, even after the higher interest on the new bond

- **Higher profitability:** Q3 Adj EBITDA of 17.4 M€ with margin at 43.4% (+340 bps), driven by the Premium Cloud focus and cost synergies
- **Disciplined investments:** Q3 CAPEX of 3.4 M€ incl. IFRS 16, on a well invested asset base with spare data center capacity
- **Positive free cash flow: EBITDA more than covers CAPEX, bond interest, taxes and working capital, leaving positive free cash flow in the quarter**

Capital allocation

A financial lever, separate from operations

- **Treasury share sale:** 12.3 M€ collected in Q3
- **Still a reserve:** remaining treasury shares (4.06% of share capital) valued at 31.2 M€, not deducted from net debt
- **Flexibility:** adds to available liquidity for capital allocation, including M&A

Key Takeaways and Outlook

Key Takeaways

1. **Q3 margins up +340 bps (Adj.EBITDA) and +450 bps (Adj.EBIT)**
   Margin expansion in every country, driven by the Premium Cloud focus and cost synergies.

2. **ARR at 91.6% of total revenues**
   High revenue visibility. Selective churn in Germany reflects the focus on higher value contracts, while Italy keeps growing.

3. **Net debt down 16.2 M€ vs 30 June 2026**
   Positive cash generation in Q3. Lower capex confirms a scalable, well invested asset base.

Outlook

TODAY

Largest commercial pipeline in WIIT history

European enterprises are rebalancing cloud spending towards sovereign European providers for their critical applications.

2027

Cloud Native Platform in the Italian Region

A further boost to organic growth in Italy, totally supported by data center capacity

Q2 2027

Return to revenue growth in Germany from Q2 2027

New orders already largely offset the churn, and available data center capacity supports growth with limited investment.

Capital allocation remains disciplined. Available liquidity and the 40 M€ ING credit lines provide financial flexibility for M&A, with preliminary due diligences under way, further supported by the possible valorisation of owned non premium data centers in Germany.

WIIT Cloud Native Platform (WCNP)

What it is

A European cloud-native platform, IaaS and PaaS, built on open standards and fully integrated with WIIT's managed Premium Cloud

1 **Open standards, no lock-in**
OpenStack and CNCF-certified Kubernetes, Infrastructure as Code and direct access to the underlying layers without proprietary licences

2 **Sovereign by design**
Data, operations and expertise remain in continental Europe under European jurisdiction, in compliance with GDPR, NIS2, DORA and, in Switzerland, FINMA

3 **Enterprise grade**
Multi-region architecture with three Availability Zones per Region, security by design

Why it matters

European companies want to retain control of their critical applications and are starting to rebalance their cloud spending between hyperscalers and sovereign European providers

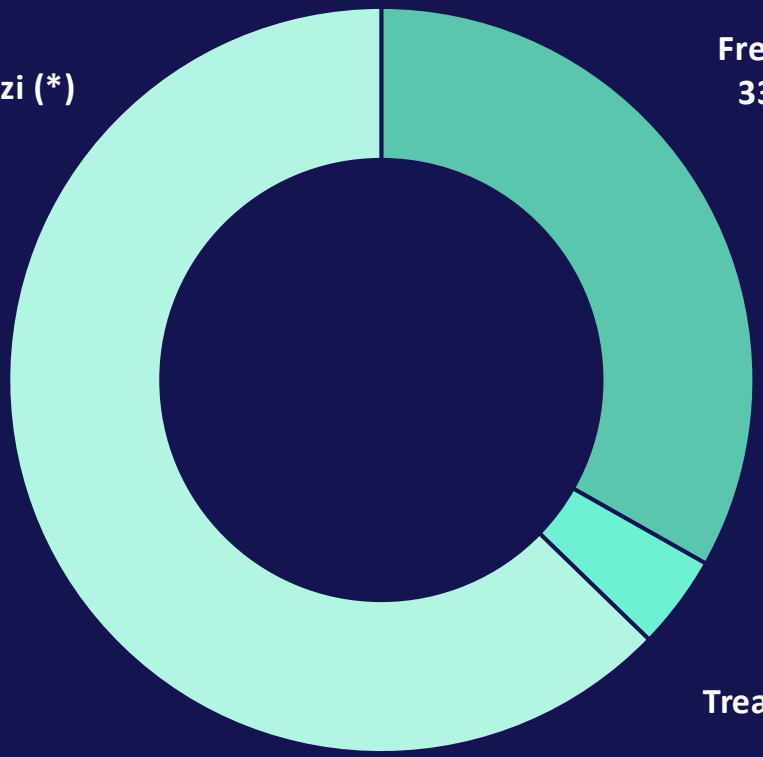

Major contract already won in Germany
WCNP selected in a competitive tender against US hyperscalers within a 9.0 M€ five-year contract. Now extending to further customers

Live in the Swiss Region
Already live with smaller customers through WIIT Schweiz AG, with discussions ongoing with larger ones. Three Availability Zones operated by Swiss staff

EARLY 2027 **Live in the Italian Region**
A further boost to organic growth in Italy, supported by available data center capacity

With WCNP, WIIT is riding the European digital sovereignty theme to capture the opportunities arising from the rebalancing of cloud spending between hyperscalers and sovereign European providers.
